ADASTAKE

What is Cardano?

Ada Is The Native Token Of Cardano

Cardano is a public blockchain platform. It is open-source and decentralized, with consensus achieved using proof of stake. It can facilitate peer-to-peer transactions with its internal cryptocurrency, ADA.

Cardano's development began in 2015, led by Ethereum co-founder Charles Hoskinson. The project is overseen and supervised by the Cardano Foundation based in Zug, Switzerland.

When launched in 2017, it was the largest cryptocurrency to use a proof-of-stake blockchain, which is seen as a greener alternative to proof-of-work protocols.

ADASTAKE

What is ada?

Ada Is The Native Token Of Cardano

It is named after Ada Lovelace: a 19th-century mathematician who is recognized as the first computer programmer, and is the daughter of the poet Lord Byron.

Ada is a digital currency. Any user, located anywhere in the world, can use ada as a secure exchange of value – without requiring a third party to mediate the exchange. Every transaction is permanently, securely, and transparently recorded on the Cardano block chain.

Every ada holder also holds a stake in the Cardano network. Ada stored in a wallet can be delegated to a stake pool to earn rewards – to participate in the successful running of the network – or found and run your own stake pool to increase the pool's likelihood of receiving rewards. In time, ada will also be usable for a variety of applications and services on the Cardano platform.

ADASTAKE

What is AdaStake?

Delegate Your Stake - To build the network, earn rewards, and become part of the AdaStake journey.

What is stake?

Ada held on the Cardano network represents a stake in the network, with the size of the stake proportional to the amount of ada held. The ability to delegate or pledge a stake is fundamental to how Cardano works.

There are two ways an ada holder can earn rewards: by delegating their stake to a stake pool run by someone else, or running their own stake pool. The amount of stake delegated to a given stake pool is the primary way the Ouroboros protocol chooses who should add the next block to the blockchain, and receive a monetary reward for doing so.

The more stake is delegated to a stake pool (up to a certain point), the more likely it is to make the next block – and the rewards are shared between everyone who delegated their stake to that stake pool.

ADASTAKE

Why AdaStake?

Designed For Mass Participation Built For Secure Decentralization

- Become a part of adastake.io, earn ada, and contribute to the decentralization of the Cardano network.

What Is Stake Delegation?

Delegation is the process by which ada holders delegate the stake associated with their ada to a stake pool. It allows ada holders that do not have the skills or desire to run a node to participate in the network and be rewarded in proportion to the amount of stake delegated.

Why Incentives?

Incentives are used to ensure the longevity and health of the Cardano network and ecosystem. The incentive mechanism is underpinned by scientific research that combines mathematics, economic theory, and game theory.

ADASTAKE

Where to get ada?

Centralized Exchanges(CEXs)

Centralized exchanges (CEXs) are platforms where cryptocurrencies and other digital assets are traded. They act as intermediaries between buyers and sellers, facilitating transactions and often providing additional services such as custodial storage, order matching, and regulatory compliance. Note that CEXs have custody over ada and other native tokens until you send them to a wallet that you control.
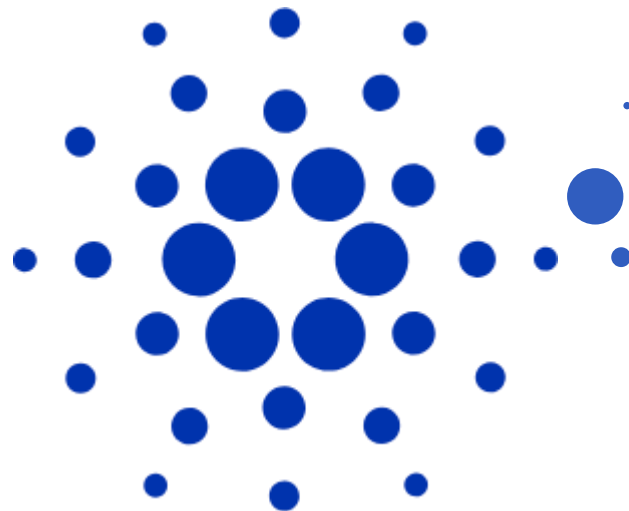

ADASTAKE

Where to get ada?

Decentralized Exchanges

Decentralized exchanges (DEXs) are platforms for trading cryptocurrencies that operate without a central authority. They allow users to trade directly with each other (peer-to-peer) through automated processes facilitated by smart contracts. This approach enhances security and privacy, reducing the risk of hacking and custodial failures associated with centralized exchanges.

Donald J. Trump ✔
@realDonaldTrump

A U.S. Crypto Reserve will elevate this critical industry after years of corrupt attacks by the Biden Administration, which is why my Executive Order on Digital Assets directed the Presidential Working Group to move forward on a Crypto Strategic Reserve that includes XRP, SOL, and ADA. I will make sure the U.S. is the Crypto Capital of the World. We are MAKING AMERICA GREAT AGAIN!
